

### Worksheet 5.4 - Tension Worksheet

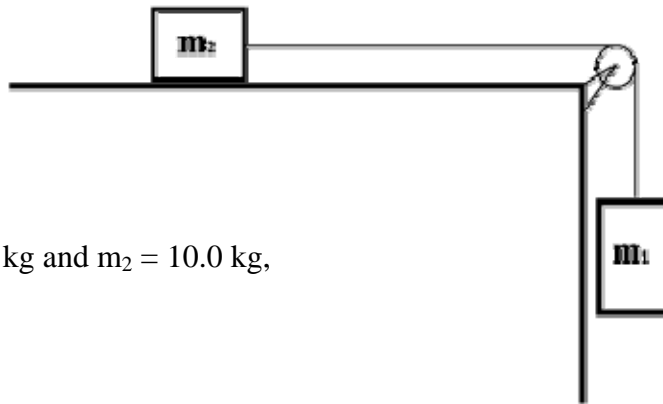

1) Two masses are connected by a rope over a pulley as shown:

$$m_1 = 7.0 \text{ kg and } m_2 = 13.0 \text{ kg}$$

- What is the acceleration of  $m_1$ ?
- What is the acceleration of  $m_2$ ?
- What is the tension in the rope on  $m_1$ ?
- What is the tension in the rope on  $m_2$ ?

2) Two masses are attached by a string as shown:

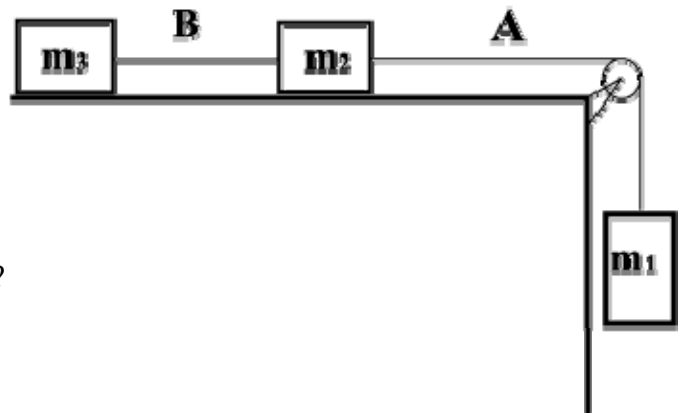

$$\text{If } m_1 = 20.0 \text{ kg and } m_2 = 10.0 \text{ kg,}$$

- Determine the acceleration of  $m_2$  assuming that the table is frictionless.
- Find the tension in the rope (no friction).
- Determine the acceleration there is a force of friction of 40.0 N.
- Find the tension on the rope (yes friction).

3) Three masses are attached as follows, assuming no friction force:

$$m_1 = 19.0 \text{ kg, } m_2 = 11.0 \text{ kg, } m_3 = 5.0 \text{ kg}$$

- What is the acceleration of the blocks?
- What is the tension in the string at point A?
- What is the tension in the string at point B?

4) Look at the diagram from question 3.

If the  $F_f$  on  $m_2$  is 35 N and the  $F_f$  on  $m_3$  is 18 N, find their acceleration.
